## SUMMARY

- Enthusiastic and self-motivated software developer with a solid foundation in computer science and hands-on experience in **MERN Stack Development** and **Java Full Stack Development**. Proficient in **full-stack development** with 8 months of practical experience building scalable applications. A quick learner with strong problem-solving abilities, effective communication skills, and a collaborative mindset. Passionate about embracing new technologies and contributing to innovative, team-driven projects in a dynamic development environment.

## SKILLS AND STRENGTHS

- **Languages:** Java, JavaScript, TypeScript
- **Frontend:** ReactJS, Redux, Angular, HTML, CSS
- **Backend:** Spring Boot, NodeJS, ExpressJS, MongoDB, MySQL
- **Tools:** Git, GitHub, Postman, OAuth

## EDUCATION

- **Shrimati Kashibai Navale College Of Engineering, Pune** 2020 – 2024  
*B.E. - Information Technology — CGPA: 8.47 / 10* Pune, Maharashtra
- **R.R. Shinde Jr. College, Hadapsar, Pune** 2019 – 2020  
*12th — Percentage: 78%* Pune, Maharashtra
- **A.B. Tupe Patil Pragati Vidyalaya, Hadapsar, Pune** 2017 – 2018  
*10th — Percentage: 87%* Pune, Maharashtra

## EXPERIENCE

- **Dreams International Company** Aug 2024 – Feb 2025  
*MERN Stack Developer Intern* Pune, Maharashtra
  - Developed full-stack SaaS product **Leads Magix** for lead management using the MERN stack.
  - Built Chrome extension for **web scraping** and **Google Maps** integration.
  - Enabled data import from Excel/CSV/APIs and implemented user access control, campaigns, and socket-based workflows.
  - Used **JWT**, **Bcrypt** for auth, **AWS S3** for storage, and integrated **Razorpay** and **Stripe** payments.
- **Dreams International Company** Feb 2025 – May 2025  
*Full Stack Developer* Pune, Maharashtra
  - Developed **Automate Magix**, a SaaS tool for automating messaging platform integrations.
  - Integrated **Gmail API**, **Telegram**, **Slack**, and **WhatsApp API**.
  - Created backend logic for real-time, event-based communication flows.

## PROJECTS

- **Fair Store (E-commerce)** Angular, Spring Boot, MySQL  
*End-to-end clothing e-commerce platform with secure authentication and payments*
  - Built a scalable e-commerce web app using Angular, Spring Boot, and MySQL with responsive design.
  - Integrated Google OAuth and JWT for secure login and Razorpay for payment processing.
  - Created admin panel to manage users, inventory, and order tracking with real-time updates.
- **QuickPing (Chat App)** 🐙 🌐 React, Redux, Node.js, Socket.io, MongoDB  
*Real-time messaging platform for individual and team communication*
  - Developed chat interface using React, Tailwind CSS, and Redux for global state management.
  - Enabled real-time messaging with Socket.io, including group chats and media sharing.
  - Integrated Google OAuth, JWT authentication, contact search, and user presence tracking.
- **OneBox (Email Client)** 🐙 🌐 React, Node.js, MongoDB  
*AI-integrated email aggregator for unified inbox experience*
  - Created a platform for managing multiple inboxes using IMAP/SMTP protocols and MongoDB.
  - Implemented Google OAuth, JWT-based authentication, and Cloudinary for media storage.
  - Integrated DeepSeek API to enable AI-based reply suggestions and email tagging.
